Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2021

Rule 13q-1 under the Securities Exchange Act (17 CFR 240.13q-1) for the reporting period from January 1 to December 31, 2021

SECTION 1 - CONFLICT MINERALS DISCLOSURE

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

This Form SD of Kimball International, Inc. (the "Company") is filed pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended, for the reporting period January 1, 2021 to December 31, 2021.

A copy of the Company's Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD, and is publicly available at www.kimballinternational.com/conflict-minerals.

Item 1.02 Exhibit

As specified in Section 2, Item 2.01 of this Form SD, the Company is hereby filing its Conflict Minerals Report as Exhibit 1.01 to this report.

SECTION 2 - EXHIBITS

Item 2.01 Exhibits

The following exhibit is filed as part of this report.

Exhibit No.	Description of Exhibit
1.01	Conflict Minerals Report of Kimball International, Inc.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

KIMBALL INTERNATIONAL, INC.

By: /s/ TIMOTHY J. WOLFE

Name: Timothy J. Wolfe

Title: *Executive Vice President,
Chief Financial Officer*

Dated: May 26, 2022

Exhibit 1.01

CONFLICT MINERALS REPORT OF KIMBALL INTERNATIONAL, INC. For the reporting period from January 1, 2021 to December 31, 2021

As used herein, the terms “Company,” “we,” “us,” or “our” refer to Kimball International, Inc., the Registrant, and certain of its subsidiaries.

This Conflict Minerals Report (the “Report”) of Kimball International, Inc. has been prepared pursuant to Rule 13p-1 and Form SD (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended (the “1934 Act”), for the reporting period January 1, 2021 to December 31, 2021. Numerous terms in this Report are defined in Rule 13p-1 and Form SD and the reader is referred to those sources and to 1934 Act Release No. 34-67716 (August 22, 2012) for such definitions. As permitted by Instruction (3) to Item 1.01 of Form SD, this Form SD and the Company’s Conflict Minerals Report exclude information regarding products of our subsidiary Poppin, Inc. and its subsidiaries, which were acquired on December 9, 2020.

The Rule requires disclosure of certain information when a company manufactures or contracts to manufacture products and the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals, which we collectively refer to in this Report as the “Conflict Minerals”, are gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, which are limited to tantalum, tin and tungsten. The “Covered Countries” for the purposes of the Rule and this Report are the Democratic Republic of the Congo(DRC), the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola. As described in this Report, certain of our operations manufacture, or contract to manufacture, products, and the Conflict Minerals are necessary to the functionality or production of those products.

Pursuant to Securities and Exchange Commission (“SEC”) guidance issued April 29, 2014 and the SEC order issued May 2, 2014, we are not required to describe any of our products as “DRC conflict free” or “having not been found to be ‘DRC conflict free,’” and, therefore, we make no conclusion in this regard in this Report. Furthermore, given that we have not voluntarily elected to describe any of our products as “DRC conflict free,” an independent private sector audit of this Report has not been conducted.

Description of the Company's Products Covered by this Report

Kimball International provides furniture to create inspirational places for working, healing, learning, hospitality and home.

This Report relates to products: (i) for which Conflict Minerals are necessary to the functionality or production of that product; (ii) that were manufactured, or contracted to be manufactured, by the Company; and (iii) for which the manufacture was completed during calendar year 2021. The Company's products that contain Conflict Minerals and are covered by this Report are referred to collectively as the “Covered Products.” The Covered Products include the following:

- Caseloads, benching solutions, desks and tables
- Collaborative workstations and contemporary cubicle systems
- Seating
- Furniture accessories

Reasonable Country of Origin Inquiry

During calendar year 2021, we conducted a good faith, reasonable country of origin inquiry regarding the Conflict Minerals by submitting surveys to our direct suppliers who may contribute necessary Conflict Minerals for the Covered Products using the Responsible Minerals Initiative/Conflict Minerals Reporting Template. This good faith reasonable country of origin inquiry was designed to determine whether any of the Conflict Minerals originated from the Covered Countries and whether any of the Conflict Minerals may be from recycled or scrap sources.

Our reasonable country of origin inquiry included:

- Assessing our products to determine the list of Covered Products;
- Identifying our direct suppliers who may contribute necessary Conflict Minerals for the Covered Products;

- Conducting a supply-chain survey with those direct suppliers using the Responsible Minerals Initiative/Conflict Minerals Reporting Template to determine if the products purchased from them contain Conflict Minerals, and if so, identifying the smelters and refiners who contribute refined Conflict Minerals to our Covered Products; and
- Reviewing the supply-chain surveys received from direct suppliers.

The Company's Due Diligence Process

Kimball International has an internal Conflict Minerals compliance team including representatives from global procurement, manufacturing, and legal, with overall support from executive leaders. The compliance team has conducted internal training sessions as needed to educate internal personnel on the requirements of the Conflict Minerals regulations.

We have a Conflict Minerals policy which incorporates the standards and recognized due diligence framework set forth in the Organization for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas including related Supplements (“OECD Framework”). Our policy, which can be found on our Company website under the “Investor Relations” tab at www.kimballinternational.com/conflict-minerals, states that we are committed to ethical practices and compliance with all applicable laws and regulations. We encourage our suppliers to source materials from socially responsible sub-tier suppliers and manufacturers and to assist us in complying with the SEC regulations by providing chain of custody declarations to verify the origin of the Conflict Minerals contained in our products. Our policy further states that we will work with our suppliers and our customers (where the supply chain has been established by our customer) to seek remedies for non-compliance. We maintain internal non-compliance guidelines for addressing those suppliers who do not respond to our request for information.

Our supply chain with respect to the Covered Products is complex, and there are many third parties in the supply chain between the ultimate manufacture of the Covered Products and the original sources of Conflict Minerals. In this regard, we do not purchase Conflict Minerals directly from mines, smelters or refiners. We must therefore rely on our suppliers, many of whom are not obligated to file a Conflict Minerals report, to provide information regarding the origin of Conflict Minerals that are included in the Covered Products. Moreover, we believe that the smelters and refiners of the Conflict Minerals are best situated to identify the source of Conflict Minerals, and therefore have taken steps to identify the applicable smelters and refiners of Conflict Minerals in the Company's supply chain.

Due Diligence Measures

We exercised due diligence on the source and chain of custody of the Conflict Minerals. We strive to conform our due diligence measures to the OECD Framework for each of the Conflict Minerals, as follows:

Step 1: Establish strong company management systems

- Established a cross-functional Conflict Minerals team including representatives from global procurement, manufacturing, and legal;
- Adopted a conflict minerals policy statement that is published on our Company's website;
- Communicated to and educated internal management and our suppliers about our Company's Conflict Minerals policy and required supply chain due diligence; and
- Provided a reporting mechanism to enable reporting of concerns with the Company's supply chain.

Step 2: Identify and assess risks in the supply chain

- Surveyed suppliers providing production materials, components and finished goods to the Company that may contain the identified Conflict Minerals using the Responsible Minerals Initiative/Conflict Minerals Reporting Template; and
- Reviewed survey responses received from suppliers, assessed those responses, and followed up on the information gathered.

Step 3: Design and implement a strategy to respond to identified risks

- Communicated with suppliers as needed to gather further information needed to clarify risks identified in the survey responses;
- Followed up with our direct suppliers who did not respond to the survey or who provided incomplete information;

- Compared the smelters and refiners identified by direct suppliers via the supply-chain survey against the list of smelter facilities which have received a “conflict free” designation on the Responsible Minerals Assurance Process’ program’s list by participating in an independent third party smelter audit; and
- Shared the Company’s Conflict Minerals policy with suppliers.

Step 4: Carry out independent third-party audit of smelter/ refiner due diligence practices

Because the Company is far down-stream from the smelters and refiners that may provide conflict minerals, we do not conduct audits or assessments of any smelters or refiners. We rely on cross-industry initiatives such as those led by EICC, responsible Minerals initiative and GeSI, including the Responsible Minerals Assurance Process.

Step 5: Report annually on supply chain due diligence

The Company files a Form SD and a Conflict Minerals Report with the SEC as required and maintains a copy of both on its website under Investor Relations-Public Filings.

As part of our due diligence efforts, we surveyed our direct suppliers who potentially contribute necessary Conflict Minerals for the Covered Products. Of those surveyed, 100% of our direct suppliers responded to the survey, representing 100% of total procurement activity (dollar spend) of those suppliers.

Our efforts to determine the mines or location of origin with the greatest possible specificity included the use of the due diligence measures described above. Annex 1 lists the smelters and refiners that the suppliers reported as being in their supply chains and others who potentially contribute Conflict Minerals for the Covered Products. Only known smelters (those listed in the Conflict Minerals Reporting Template) are included in Annex 1.

Because we did not receive sufficient information from suppliers and other sources during our due diligence process, we were unable to identify all of the facilities used to process those necessary Conflict Minerals or their country of origin.

To the extent we continue to be subject to the requirements of the Rule, we expect to take the following steps, among others, to improve our due diligence measures:

- Continue to include provision in terms and conditions with suppliers requiring them to comply with the Rule and with our survey and compliance efforts; and
- Continue to engage with suppliers to obtain current, accurate and complete information about the supply chain.

Forward Looking Statements

This Conflict Minerals Report contains forward-looking statements, which are based on our current expectations and involve numerous risks and uncertainties that may cause these forward-looking statements to be inaccurate. Forward-looking statements include, among other things, statements regarding steps we expect to take to improve our due diligence process if we continue to be subject to the requirements of the Rule. All forward-looking statements involve risk and uncertainty. Risks that may cause these forward-looking statements to be inaccurate include: failure to carry out these plans in a timely manner or at all; lack of cooperation or progress by our suppliers, their respective suppliers and smelters; or lack of progress by smelter or refiner validation programs for Conflict Minerals (including the possibility of inaccurate information, fraud and other irregularities).

ANNEX I
